

**CSW Communications Procedure:  
Data Shows Trans Aren't Vulnerable - Women are.**

**REGARDING: The Feminist Legal Clinic Eviction July 25th, 2021, Sydney, Australia, and the global attack on women's sex-based rights and protections.**

This is a *pro-woman* organisation in a First-World Country, being evicted for their focus on helping women who are victims of domestic violence and facing family court. "Aside from the obvious attack on freedom of speech, we believe this conflict is representative of broader efforts to undermine women's sex-based rights," said the clinic's Principal Solicitor Anna Kerr."

I'd also like to bring your attention to several important facts that you may not be aware of; references to follow:

1. Trans people are not vulnerable nor marginalised
2. Not only are they not vulnerable, their causes are backed by billionaires
3. Not only are they not vulnerable, but they cause *more harm* to others than is over done to them.
4. The Equalities and Human Rights Commission (EHRC) have abandoned the "Stonewall Diversity Champion's Scheme" - a well-funded psy-op that recruited unknowing "trans-allies" at the expense of reality, and women's and LGB rights,
5. A Landmark case was recently won by a woman who was fired for believing in the reality of sex, and not the "idea" of gender; this ruling carries international weight, and it is now legally and lawfully safe to return to advocating for reality over fiction, while also now being illegal and unlawful to show prejudice toward women and others for defending women's sex-based rights.
6. Due to this ruling - along with the EHRC - there has been a mass-exodus by Universities from the "Stonewall Diversity Champion's Scheme"
7. According to a Cambridge University Study, Trans are *six-times more likely* to have Autism - people with Autism need adults, not enablers, and often need to be taught to accept the word NO, and respect others.

The damage we are left with isn't from the LGB, but from the T - mostly, selfish males. The Females tend to disappear...

The *issue* isn't with the LGB, the issue is with the T - mostly, selfish males.

The females tend to disappear...

Not only are the males raping and murdering women and children (as usual) but the Trans-Identified Males are also doing things like stealing Olympic opportunities from young indigenous women. [1]

Even Caitlyn Jenner agrees that male-bodies should not be in girls' sports; he will always be a dad, first.

Women who object are silenced, banned, and deplatformed online and in the workplace - that's why we never hear their side of the story.

However, the tides are turning... Stonewall created what has turned into a Military Operation, placing transgender wants above the needs, rights, and safety of women, and recruiting influential bodies to do their bidding for them.

The Equalities and Human Rights Commission have just left the "Diversity Champions Scheme", and many Universities are now following suit due to legal fears, after a woman was fired from her job for speaking up for women's rights, and then won a landmark case stating being critical of trans/gender/identity is worthy of respect in a democratic society, and it is now illegal and unlawful to punish women who speak up for their rights, protections, and safety.

"At least 40 organisations that we know of have left Stonewall including the Cabinet Office, Ministry of Justice, Ofsted and the Equality and Human Rights Commission." [2]

Trans people are not vulnerable; they are funded by billionaires like Martin Rothblatt and the Getty's, and - worst of all - transgender (males) cause MORE harm/death/rape/murder/femicide than any harm that is ever caused to them by anyone. [3]

If countries want to stop their birth-rates from declining, they would do well to respect and protect women and girls - only women who feel safe desire to become mothers. The alternative is surely dystopian.

Please share this information far and wide with your colleagues if you know in your Heart that this has been wrong, all along.

As mentioned, the problem is with the T. The LGB Alliance has been formed, globally, to protect LGB people from Homophobic, Transgender Predators who don't respect same-sex relationships - especially the males, who call themselves Lesbians, and rape homosexual women. Women, and the LGB really need our help.

Autism is a cognitive disability. They create words like "neuro-typical" and "neuro-diverse" to understand the world. The world isn't "non-autistic", the world is "normal"; default. Language matters.

People with Autism need Adults - not enablers that cause harm to reality and others.

Children with invisible disabilities or learning difficulties are often neglected and discarded. Ignoring a problem doesn't make it go away. [4]

Female-to-Male Transsexuals agree that definition needs to be made between males with Autogynephilia (AGP) who are a threat to women, and homosexual transsexuals, who pose little to no threat to women. [5]

A question for you: why is it, that the *most* vulnerable women in society are the ones who have to spend what little energy we have, fighting for our safety and sanity. This is 2021; the future is *now*.

I would much rather be writing my romance novel, or thinking about having a baby, but instead, I have to become a full-time feminist - for no pay or reward - in order to protect myself and other women, because the people who are *supposed* to protect us aren't doing their job.

I feel the most betrayed by women and so-called "women's advocacy groups" who choose dissociative transgender delusion over women's safety and reality; and that I may never live to hear your collective apology to women.

In Closing here are 40+ Peer-Reviewed Academic Papers proving there are only two-sexes: Male and Female. Who are either Heterosexual, Homosexual, or Bisexual. With just 0.2% of those men and women being born with Variations of Sex Development/Disorders of Sex Development (VSD/DSD/Intersex).
